jamf

Jamf Premium Cloud Plus

Designed to give you the flexibility you need from the cloud.

Leave the infrastructure to us

As the number of devices in your environment increases, so does the need for scalable, globally available services to manage them. Jamf offers the ability to host their Jamf Pro server in the cloud. Jamf Premium Cloud Plus takes that a step further.

Jamf Premium Cloud Plus is an elevated cloud hosting environment that provides flexibility, control and compliance. Choose when you'd like to upgrade, safelist IPs and more. Get even more out of your Jamf Pro server.

What you get with Jamf Cloud

Software distribution point: Built-in cloud distribution service for global package distribution

Server uptime: Jamf guarantees 99.9% server uptime

Data center locations: United States

Disaster recovery: Automatic daily backups for 30 days

Service monitoring: All cloud services are monitored by Jamf with a status dashboard

Security: Industry-standard security controls for hosting service*

Scale: Hosted Jamf Pro server with immense scalability

Jamf Premium Cloud Plus adds

Upgrade control

- Choose when your Jamf Pro server is upgraded, including off-hour or weekend upgrades
- Choose and upgrade to any current or past two versions
- Address change management, and validation testing

Secure ports

- Secure how Jamf Pro communicates to external services over ports
- Choose what ports are used by your instance

IP Safelisting

- Limit log-in access to certain IP address ranges
- Lock-down who can log into the server based on network address
- Limit access to certain IP addresses for API calls

Jamf log stream

- Stream externally the access and/or change management logs
- Automated log stream to a customer provided AWS S3, Splunk or HTTPS endpoint
- Satisfy organization compliance standards

Third-Party SSL certificates

- Extra security in the chain of trust for connected components
- Connect Jamf Premium Cloud Plus to internal resources via certificates
- Gain additional security control by using certificates

Compliance

- Industry-standard NIST 800-53 controls implemented across the environment

Pricing and availability

Jamf customers can add this premium feature for $50,000 per year. Customers will get one production server and one sandbox server. Additional sandboxes including all premium features (Upgrade Control, IP Safelisting, Customer URL, Third-Party SSL Certificates, Secure Ports and Hosting) can be added for an additional $5,000/yr.
