Jamf Now
Sub-processors

Jamf may engage vendors to provide services on our behalf. Any vendor who may process Customer Content, as defined in Jamf's Software License and Services Agreement (SLASA), are considered sub-processors and are disclosed below. As set forth in Jamf's Data Processing Agreement (DPA), Jamf has adequate data transfer mechanisms in place with each sub-processor.

Sub-processor	Location(s) of processing	Purpose of processing
Amazon Web Services	United States	Cloud hosting
Amazon Web Services*	Australia, Brazil, Canada, France, Germany, India, Ireland, Italy, Japan, Singapore, South Africa, South Korea, Sweden, United Kingdom, United States	Regional edge services
Astronomer, Inc.*	United States	Orchestration and workflow management for data pipelines
MongoDB, Inc	Ireland	Managed database services
Twilio, Inc. (Sendgrid)	United States	Email notifications

*These sub-processors process data for the Web Protection functionality in Jamf Now. Regional edge services are dynamically chosen based on proximity to the endpoint.

Jamf may use additional sub-processors for customer support – see the sub-processor listing for Jamf Support.
