Jamf School
Sub-processors

Jamf may engage vendors to provide services on our behalf. Any vendor who may process Customer Content, as defined in Jamf's Software License and Services Agreement (SLASA), are considered sub-processors and are disclosed below. As set forth in Jamf's Data Processing Agreement (DPA), Jamf has adequate data transfer mechanisms in place with each sub-processor.

Sub-processor	Location(s) of processing*	Purpose of processing
Amazon Web Services, Inc.	Germany, Japan, United States	Cloud hosting
Astronomer, Inc.	United States	Orchestration and workflow management for data pipelines
OneSignal, Inc.	Netherlands	Push notifications

* The countries listed are the sub-processor's locations from which this Jamf product is made available. Customers may choose the specific location in which they would like the product hosted.

Jamf may use additional sub-processors for customer support – see the sub-processor listing for Jamf Support.
