

What does it mean to be a **Jamf MSP?**

We provide...

Enablement

Unlimited access to our online training catalog will help you build your Jamf practice. Or you can leverage a technical path with hands-on, scenario- and example-based certification courses.

Support

We have a global MSP team standing by to provide real, human support – from marketing, to business development, to operations – all ready to help ensure that your organization succeeds with Jamf and Apple. In addition to this, your admins will also benefit by receiving priority escalation from our Technical Support team for any tickets they log with us.

Community

Our MSP User Group (JMUG) meetings are where you can connect and network with like-minded professionals. Or build community within your organization with Jamf Heroes (available in select regions).

Return on Investment

Realize exclusive MSP margins on solutions that boost your average bill rate per user. Beyond that, you'll become profitable, grow and scale faster with per-user licensing (based on usage) and no seat minimums for the first year.

Why should you become a Jamf MSP Partner?

- Zero-touch deployments
- Reduce number of IT calls
- Improve compliance
- Manage + secure Apple

How do you become a Jamf MSP Partner?

A Jamf Partner Manager will reach out to discuss the program and expectations. If there is a mutual fit, you can become a partner in just **3 simple steps!**

1. Provide technical and billing contacts
2. Complete Jamf 100 Certification
3. Sign the agreement
