

13 Ways K-12 Schools Are Already Using AI

AI is already in classrooms and IT departments. Here's a quick look at how schools are putting it to use, from the classroom to the help desk.

For Educators

- **Drafting lesson plans & worksheets**
Generates objective-aligned plans, worksheets and discussion questions in minutes.
- **Auto-generating rubrics & feedback**
Aligns rubrics to standards and speeds up grading and feedback.
- **Multilingual parent communication**
Translates and adapts messages for every family's language and reading level.
- **On-demand coaching & PD**
Lets teachers rehearse tough conversations and sharpen technique anytime.

For Accessible learning

- **Personalized, one-to-one tutoring**
Guides students through questioning and practice at their own pace.
- **AI reading fluency coaching**
Gives real-time feedback on pronunciation, fluency and comprehension.
- **Text-to-speech & translation support**
Removes language and accessibility barriers to written work.
- **Instant study guides & flashcards**
Turns class notes into personalized practice materials.

For IT & Operations

- **Smarter help desk ticket routing**
Automatically categorizes and prioritizes incoming IT tickets.
- **Early-warning attendance & risk flags**
Surfaces at-risk students before a crisis develops.
- **Vendor contract & renewal analysis**
Flags duplicate spend and forecasts contract renewal risk.
