Jamf Threat Defense
Sub-processors

Jamf may engage vendors to provide services on our behalf. Any vendor who may process Customer Content, as defined in Jamf's Software License and Services Agreement (SLASA), are considered sub-processors and are disclosed below. As set forth in Jamf's Data Processing Agreement (DPA), Jamf has adequate data transfer mechanisms in place with each sub-processor.

Sub-processor	Location(s) of processing*	Purpose of processing
Amazon Web Services, Inc.	Ireland	Cloud hosting (Core services)
Amazon Web Services, Inc.	Australia, Brazil, Canada, France, Germany, Hong Kong, India, Ireland, Italy, Japan, Singapore, South Africa, South Korea, Spain, Sweden, Switzerland, United Kingdom, United States	Regional edge services
Astronomer, Inc.	United States	Orchestration and workflow management for data pipelines
Google LLC (Google Cloud Platform)	Belgium, Netherlands	Regional edge services
MongoDB, Inc.	Ireland	Managed database services
Tableau Software, LLC	Ireland	Ad-hoc requests by customers for reports
The Rocket Science Group, LLC (Mailchimp)	United States	Email notifications

T-Systems International GmbH	Germany	Regional edge services

* The countries listed for regional edge services are dynamically chosen based on proximity to the endpoint.

Jamf may use additional sub-processors for customer support – see the sub-processor listing for Jamf Support.
