

Jamf Mobile Forensics Sub-processors

Jamf Mobile Forensics was formerly known as Jamf Executive Threat Protection.

Jamf may engage vendors to provide services on our behalf. Any vendor who may process Customer Content, as defined in Jamf's [Software License and Services Agreement](#) (SLASA), are considered sub-processors and are disclosed below. As set forth in Jamf's [Data Processing Agreement](#) (DPA), Jamf has adequate data transfer mechanisms in place with each sub-processor.

| Sub-processor | Location(s) of processing | Purpose of processing |
|---------------------------|---------------------------|---|
| Amazon Web Services, Inc. | Ireland | Cloud hosting |
| Astronomer, Inc. | United States | Orchestration and workflow management for data pipelines |
| Clickhouse, Inc. | Ireland | Managed database services |
| Gainsight, Inc. | United States | Customer experience analytics and in-product communications |
| Microsoft Corporation | Sweden | AI Analysis feature using Azure OpenAI* |
| MongoDB, Inc. | Ireland | Managed database services |
| Twilio, Inc. (Sendgrid) | United States | Email notifications |

* AI Analysis is disabled by default for all customers.

Jamf may use additional sub-processors for customer support – see the sub-processor listing for Jamf Support.
