

Jamf School

Sub-processors

Jamf may engage vendors to provide services on our behalf. Any vendor who may process Customer Content, as defined in Jamf's [Software License and Services Agreement](#) (SLASA), are considered sub-processors and are disclosed below. As set forth in Jamf's [Data Processing Agreement](#) (DPA), Jamf has adequate data transfer mechanisms in place with each sub-processor.

Sub-processor	Location(s) of processing	Purpose of processing
Amazon Web Services, Inc.	Germany, Japan, United States	Cloud hosting*
Astronomer, Inc.	United States	Orchestration and workflow management for data pipelines
Clickhouse, Inc.	Germany, Japan, United States	Managed database services
Gainsight, Inc.	United States	Customer experience analytics and in-product communications
MongoDB, Inc.	Germany, Japan, United States	Managed database services
OneSignal, Inc.	Netherlands	Push notifications

* The countries listed are the sub-processor's locations from which this Jamf product is made available. Customers may choose the specific location in which they would like the product hosted.

Jamf may use additional sub-processors for customer support – see the sub-processor listing for Jamf Support.
