

Jamf Seamless Learning Sub-processors

Jamf may engage vendors to provide services on our behalf. Any vendor who may process Customer Content, as defined in Jamf's [Software License and Services Agreement](#) (SLASA), are considered sub-processors and are disclosed below. As set forth in Jamf's [Data Processing Agreement](#) (DPA), Jamf has adequate data transfer mechanisms in place with each sub-processor.

Sub-processor	Location(s) of processing	Purpose of processing
Amazon Web Services, Inc.	Australia, Germany, Japan, Sweden, United Kingdom, United States	Cloud Hosting ¹
Elastic.io GmbH	United States	Log aggregation for support and service maintenance
Gainsight, Inc.	United States	Customer experience analytics and in-product communication
Twilio, Inc.	United States	Email notifications

1 The countries listed are the sub-processor's locations from which this Jamf product's hosting is made available. Unless a customer chooses a specific location, their hosted location will be the closest geographically to their business address.

Jamf may use additional sub-processors for customer support – see the sub-processor listing for Jamf Support.
