The reality of a mobile workforce

Organizations must protect access to company resources, no matter where employees are located. That's why you need Apple-built solutions that protect sensitive company data and resources from malicious actors and security threats outside of a traditional network perimeter.

Secure, modern access

Jamf Pro and **Jamf Connect** allow you to verify enrolled devices and identities ensuring secure access to company resources.

Jamf takes it further. You can:

- Provide personalized device setup based on the user's cloud credentials through zero-touch deployment
- Automate inventory collection to keep track of devices and receive update alerts
- Secure and fully control device data— even when lost or stolen
- Ensure use of a single cloud identity across devices and applications
- Employ granular policies and isolated connections with Zero Trust Network Access (ZTNA), purpose-built for Apple

◢ jamf

Tap into a better solution

Simply purchasing Apple is a good start, but it's what organizations do with their devices that makes the difference.

Identity and access management
Provide users with a seamless log-in experience from onboarding to access with one set of cloud identity credentials

Inventory management
Collect user, hardware, software and device security data to understand the health of your entire environment

Zero Trust Network Access (ZTNA)
Secure access to business resources and applications

App management
Increase end user productivity with automated workflows to update and deploy apps

Zero-touch deployment
Deploy personalized devices to users anywhere without touching the device

Self Service
A curated, on-demand user catalog of approved apps, settings, and resources

Mobile Device Management (MDM)
Automate and scale ongoing device management and security tasks

Endpoint protection
Purpose-built for Apple, protect devices from threats to keep organization and personal data safe

Manage and Secure Apple at Work

We believe it's technology's job to enable user productivity and creativity. To empower organizations to keep devices safe and protected. To simplify work.
