jamf

Jamf Premium Cloud

Designed to give you the flexibility you need from the cloud.

Leave the infrastructure to us

As the number of devices in your environment increases, so does the need for scalable, globally available services to manage them. Jamf offers customers the ability to host their Jamf Pro server in the cloud. Jamf Premium Cloud takes that a step further.

Jamf Premium Cloud is an add-on for cloud hosting that provides you with flexibility and control over your server. Choose when you'd like to upgrade, safelist IPs and more. Get even more out of your Jamf Pro server.

What you get with Jamf Cloud

✓ **Software distribution point:** Built-in cloud distribution service for global package distribution

✓ **Server uptime:** Jamf guarantees 99.9% server uptime

✓ **Data Center Locations:** United States, United Kingdom, Germany, Japan and Australia

✓ **Scale:** Hosted Jamf Pro server with immense scalability

✓ **Disaster Recovery:** Automatic daily backups for 30 days

✓ **Service Monitoring:** All cloud services are monitored by Jamf with a status dashboard

✓ **Security:** Industry-standard security controls for hosting service*

✓ **Integration:** Integration with enterprise authentication and identity services

What Jamf Premium Cloud adds

Upgrade Control
- Choose when your Jamf Pro server is upgraded, including off-hour or weekend upgrades
- Choose and upgrade to any current or past two versions
- Address change management, and validation testing

IP Safelisting
- Limit log-in access to certain IP address ranges
- Lock-down who can log into the server based on network address
- Add an extra layer of network security for your cloud instance

Third-Party SSL Certificates
- Extra security in the chain of trust for connected components
- Connect Jamf Cloud to internal resources via certificates
- Gain additional security control by using certificates

Secure Ports
- Secure how Jamf Pro communicates to external services over ports
- Choose what ports are used by your instance

Hosting
- Jamf Cloud Distribution Service is available for all Jamf Cloud subscribers
- Backups are retained for 30 days for all customers

Jamf Log Stream
- Visibility into access or change management logs
- Automated log stream to a customer provided AWS S3 bucket destination or a customer Splunk endpoint
- Satisfy organization compliance standards

Pricing and Availability

Existing Jamf Cloud customers can add this premium feature for $20,000 per year. Customers will get one production server and one sandbox server. Additional sandboxes including all premium features (Upgrade Control, IP Safelisting, Customer URL, Third-Party SSL Certificates, Secure Ports and Hosting) can be added for an additional $5,000/yr.

💰 Price	🖥 Servers
$20,000/yr	1x Production 1x Sandbox

Jamf Premium Cloud Plus

For organizations operating under strict regulatory and compliance requirements, Jamf Premium Cloud Plus is the best way to manage devices at scale while still keeping data and applications protected.
