

# Jamf School @ Home

Help teachers, students and parents move to a virtual environment.

**Educators can use Jamf School — and its extended School @ Home features and apps — to shift effectively and easily to a remote learning environment.**

As remote learning becomes more prevalent, students may struggle to get the teachers' attention, teachers may find it hard to learn new remote teaching methods, and it can be difficult for parents to keep their children focused on homework tasks while at home.

To deliver on our commitment to empower educators, students and parents with the resources they need, we continue to evolve our education solutions.

The **Jamf School Student** app now includes “Raise Hand” functionality that allows students to virtually raise their hand, sending the teacher an immediate message in the form of a pop up on their device.

The **Jamf School Teacher** app comes with a Help Guide — full of videos and tutorials — for guidance on how to teach remotely, and empowers teachers to leverage “Share a Lesson” functionality to share their custom lessons with other educators.

The **Jamf Parent** app is now available on watchOS and allows parents to manage their child's device directly from their wrist. Parents can use the app to set restrictions, manage app usage and set times when certain games and apps are allowed.

To get started with Jamf School today, **request a free 30-day trial**. We are also running a special offer through Apple Education, where you can use Jamf School with unlimited devices for 120 days. Click on the link below to get started with your exclusive Apple and Jamf education offering, or email us at **[apple.education@jamf.com](mailto:apple.education@jamf.com)**.
