

# neo42 JamfConnector for Matrix42

**The neo42 JamfConnector for Matrix42 simplifies the import of devices from Jamf Pro into Matrix42 asset management.**

Import your devices from Jamf Pro into Matrix42 with the neo42 JamfConnector and watch your IT experience improve for admins and users alike. Matrix42 helps organizations **digitize and secure** the workplace environment by managing devices, applications, processes and services.

The JamfConnector allows for deeper integration and compilation of inventory into your IT Service Management (ITSM) software for seamless automation of your IT processes. Part of the import process considers installed applications; admins can use this data for Matrix42 **license management.**

## Why use JamfConnector?

- This integration keeps Jamf and Matrix42 at the forefront of endpoint management and ITSM automation.
- This software supports integrating physical, virtual, mobile and cloud-based workspace environments into existing infrastructures.
- In addition to importing devices, JamfConnector also sets up a provision workflow for group assignments— enabling a variety of actions in the service catalog.

**Visit the Jamf Marketplace to get started with the neo42 JamfConnector.**
