

Powerful device management designed for teaching and learning

*Bring your influence into the classroom.
Build purposeful, individualized instruction.*

A purpose-built, MDM solution for any school, any size, anywhere in the world.

Jamf School is more than an MDM. Purpose-built for education, it simplifies every step of managing Apple devices while giving IT the control and visibility they need. With an intuitive web interface, deploying, securing, and supporting Mac, iPad, iPhone, and Apple TV is effortless, freeing IT to focus on users and learning outcomes, not problems.

Jamf School is a powerful and affordable MDM for the modern, digital classroom.

Whether you've been using Apple for years and have thousands of devices in your schools, or are just beginning to integrate Apple devices into your learning curriculum, Jamf helps schools of all sizes engage with students in new ways and deliver an active learning environment with Apple devices.

Why use Jamf School?

You chose Apple devices for their versatile and transformative ability support learning. Meet the purpose of both IT administration and classroom practice with all you need to manage and maintain devices – wherever teaching and learning happens.

IT Essentials

Automate everything

Bring automation to how you deploy devices, learning content, apps, operating system updates and learning success. Reduce your workload and bring success to learning outcomes.

Tackle multiple locations easily

With location support, manage each location and its devices, users and groups separately, pushing down profiles, apps and more, all from a single location.

Dashboard for insights

Keep track of managed devices, users and apps. See the status of devices quickly and easily to identify issues for remediation.

App management

Jamf School offers a Mac-App-Store-like experience, saving time and automating app lifecycle management by sourcing, packaging and deploying the most up-to-date version of apps.

Blueprints that work for IT and learning

Jamf School Blueprints let IT automate device setup across classrooms and locations, ensuring every Mac, iPad, iPhone, or Apple TV is ready for learning from day one. Flexible templates and a simple builder save time, enforce compliance, and give IT the confidence that every setup supports student success.

Elevate Learning

Transform classroom management with teacher and student apps

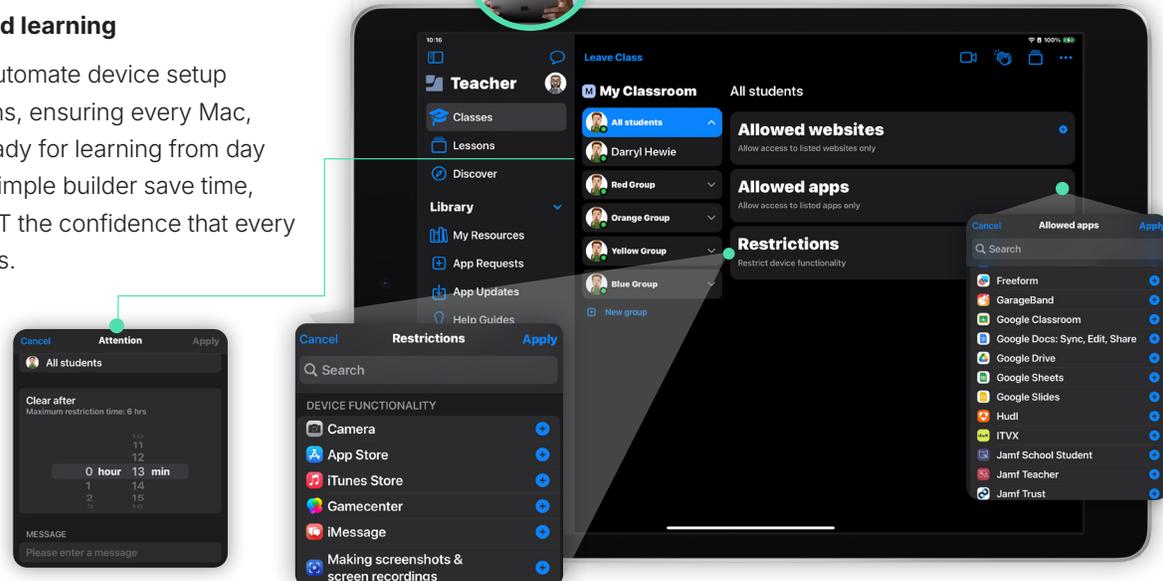

Classes can be easily managed by dragging and dropping the required apps and content and creating restrictions. Students can set up their own device and stay focused with Jamf Student, instructors prepare lesson profiles and communicate with students within Jamf Teacher.

App request

When an app is requested, IT administrators are notified so they can review and approve or deny the app request. The teacher is immediately notified of the decision.

Easily involve parents in learning

The Jamf Parent app offers simple setup and controls for parents, giving them the ability to limit apps and device functionality to keep homework sessions focused at home.
