

The return on investment (ROI) with Jamf Connect

See the cost, time and resource savings of an identity management solution.

Time and money are wasted when users can't access their resources. Something so common as a forgotten password can bring work to a screeching halt. In fact:

Forrester Research says Mac users average **three help desk tickets** per year

31% of all Mac help desk tickets are password-related according to [Vanson Bourne](#)

[Okta](#) determined a single password reset request costs companies an average of **\$70**

Benefits of Jamf Connect

[Jamf Connect](#) streamlines Mac account provisioning and identity management, giving users the power to leverage a single cloud identity on a Mac to gain immediate access to the resources needed to be productive. Resulting in:

Reduction in **VOLUME** of help desk tickets

Reduction in **END-USER** productivity loss

How much will you save with Jamf Connect?

If you're ready to put real numbers behind the real value of a dedicated identity management solution, contact your [Jamf representative](#) or try it for yourself.
