Total Security Coverage in Education

Combining Jamf Safe Internet and Jamf Protect

Secure your network and users — from Mac to mobile

Modern, sophisticated threats look exactly like trusted sources and as diligently as we train our users, you need an extra layer of defense. With schools focusing on personalized learning and independent student work, schools are susceptible and want to know their students are not at risk of online threats. Solutions must be in place to address concerns for both students and staff.

Integrating Jamf Safe Internet and Jamf Protect into your security strategy, combines best-in-class network threat prevention and a vast content-filtering database to block unsafe content and malicious attacks such as malware or phishing so students can learn fearlessly.

Complete your security posture with Jamf

- Protect end users against phishing, malware threats, and more
- Enforce acceptable use policies, don't just put them in writing
- Provide robust content filtering across every app on a device
- Ensure that students are protected with Google Safe Search and YouTube Restricted Mode, even when working independently
- Offer heightened security without students and staff fearing privacy invasion

Jamf Protect + Jamf Safe Internet: What do you get?

Jamf Safe Internet for Macbook and iPad:

Network Threat Prevention
Jamf Protect leverages MI:RIAM — our machine learning engine — to prevent known threats like malicious domains used in phishing attacks, while Jamf Threat Labs helps threat-hunting teams detect unknown threats.

Content Filtering
Create and customize the level of content control that fits each class to protect against harmful content on the internet.

Privacy first, Apple best
Leverage the latest DoH technology available on Apple platforms to prevent harmful content without invading the students privacy.

Better together
Close integration with Jamf School and Jamf Pro makes deployment and syncing a breeze.

Jamf Protect for Macbooks:

Endpoint security
Comprehensive detection and protection for Apple-specific malware and attacks. Data loss can be prevented with device controls to manage removable storage devices.

Compliance and visibility
Jamf Protect helps organizations with their device compliance goals through customizable benchmark reporting and logging rich telemetry data for comprehensive context into security events.

Security is a journey. When looking at security solutions for content filtering to network threats, see how Jamf Safe Internet combined with Jamf Protect offers education users peace of mind.
