

# Enhance the Mac Experience. Elevate IT, improve Security.

*Simplify Mac at Work – Unifying  
Mac Management & Security for IT*

## Take Control of Mac management and security

*Mac management in a Windows-first environment often means deploying tools that weren't built for Apple. This results in frustrated users, security gaps and extra work for IT.*

With Jamf for Mac, IT can manage and secure their Mac fleet with a platform designed for Apple — while giving Security teams the telemetry and insights they need to ensure compliance, reduce risk and protect company data.

## With Jamf for Mac, IT can:

**Streamline Mac management** and security under one platform.

Eliminate **Windows-first** security challenges for Mac users.

Give Security teams the insights they need and keep the **Mac experience native**.

Increase **productivity** and **reduce risk**.

## Jamf for Mac Capabilities
