	\$14.66 per device/year	\$9.00 per device/year	\$20.00 per device/year
	NO classroom management or identity and access management	48% savings compared to the industry average	51% savings compared to the industry average

* Industry average = average of the yearly cost of competitor products that have comparable capabilities.

Calculated using competitors' undiscounted MSRP prices.

Comparing Jamf pricing to ‘free’ education MDM

‘Free’ MDM tools that are part of a larger subscription cannot give you:

Tools that are purpose-built for Apple, purpose-built for education

Jamf is designed for ease of use and provides education-focused, Apple-specific support to your management solution. This saves your IT team time and money.

Management that goes beyond device deployment

Your device deployments have a real in-classroom impact. Jamf’s education-specific integrations with Apple Classroom and Shared iPad extend your existing tech stack to get more out of what you have, maximizing your return on investment.

Extended iPad usage.

Jamf supports features such as return to service which simplifies shared device deployments, readying them for the next user.

Mac classroom management

App Installers and Custom scripting options enhance your Mac management.

Apple TV support

Focused use of Apple TV for content sharing and classroom use enhances educational focus in both classrooms and social areas.

Staff equipped for confident technology use

Staff absolutely must be confident in using devices to keep the focus on education instead of tech-wrangling. Jamf classroom apps empower educators to feel in control of the technology, without wasting time on IT help desk tickets.
