

A woman with dark hair in a bun, wearing glasses and a dark sleeveless top, is looking at a computer monitor in an office setting. The monitor displays a software interface with various charts and data points.

Jamf Security Essentials

Harden your baseline.

Deploying a hardened baseline is the first step in securing your workforce. To do this, you need to understand your security requirements and have the necessary tools to complete the task. Our team has the knowledge and the tools to turn this from a massive undertaking into a single-day event. In addition to this, we will review your current Jamf Pro and Protect settings to ensure that you are setup for simplicity and functionality.

What's covered?

- Workstation hardening
 - macOS Security Compliance Project (MSCP)
 - Custom configuration of industry guidelines
- Server review
 - Review Jamf Protect analytics, plans, and actions
 - Review Jamf Pro configuration profiles and policies
- Jamf products
 - Jamf Pro
 - Jamf Protect
 - Compliance Reporter

Customer benefits

- Develop, deploy, and audit your security baseline
- Ensure that your Jamf products are configured properly
