jamf | PRO

Jamf Pro Teacher app

Easy to use, easy to integrate.

Offer students and teachers flexibility, choice and increased engagement with the Jamf Pro Teacher app: a free iPad app that gives teachers basic management of their students' school-issued devices.
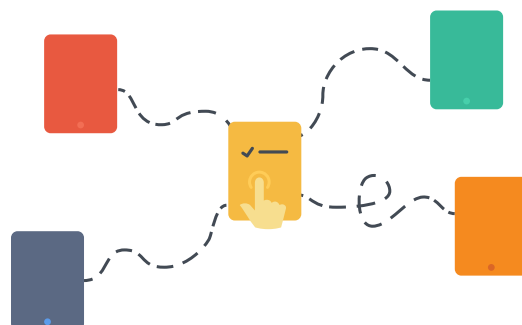

Features

With the Jamf Pro Teacher app, teachers can:

- Enhance classroom management by allowing students to access specific apps and websites during set hours

- Create and start lessons by allowing students to only access apps and websites specifically needed for the lesson during the class time

With the Jamf Pro Teacher app, Apple admins can:

- Configure how long the Jamf Pro Teacher app restrictions can be set on student devices and during what specific timeframe

- Remove restrictions set by the Jamf Pro Teacher app using a mass action or remote command

Setup and requirements

To integrate the Jamf Pro Teacher app with Jamf Pro, you will need:

- A Jamf Pro user account with read and update privileges for the Jamf Pro Teacher app

- Supervised devices assigned to students and teachers

- Classes created in Jamf Pro (For more information, see Classes)

- (On-premises only) A valid SSL certificate obtained from a third-party vendor (for more information, see SSL Certificate)

- (On-premise only) Allow secure inbound connections from "student-api.services.jamfcloud.com"

To use the Jamf Pro Teacher app, teachers need:

- A mobile device with iOS 10.11 or later

- With the Jamf pro Teacher app installed

Give teachers better classroom and lesson management with the Jamf Pro Teacher app: another pencil in your box for K-12 management from Jamf.
