

# The anecdotes Compliance OS

Data-powered security compliance automation that integrates with Jamf Pro

## Empower compliance leaders with one comprehensive and scalable automation solution

**One common difficulty for companies as they scale** is the increasing number and complexity of compliance frameworks that they are required to adopt. Diligently keeping up with these programs can become a major drain on organizational time and resources, while failing to follow them properly can weaken companies' security posture and deter potential customers.

anecdotes addresses this problem by offering a centralized workspace to collect evidence and manage and automate security compliance programs. The anecdotes Compliance OS is designed to transform compliance from a box-ticking exercise into a powerful driver of growth for scale-ups, publicly traded companies and everything in between. With a variety of applications powered by verified data, compliance leaders can turn manual, time-consuming and siloed tasks into an automated, continuous and strategic compliance journey.

anecdotes is configurable to the needs of the individual organization, with customized frameworks, requirements and controls. anecdotes' Data Delegation enables organizations to maintain full control of their data – storing sensitive information in their public or private cloud.

## The anecdotes Compliance OS features

Your organization can utilize the anecdotes Compliance OS for a full range of compliance applications contributing to your ongoing security compliance program, including:

- Automated evidence collection
- Framework monitoring
- Policy management
- Risk management
- User access review

## anecdotes + Jamf

**anecdotes offers over 100** integrations to HR, ticketing, MDM, dev tools and other solutions, including Jamf Pro. By integrating anecdotes and Jamf Pro, data-based evidence is automatically collected from Jamf and mapped to the relevant controls and frameworks on the anecdotes Compliance OS to inform your compliance programs. The integration allows you to leverage data in Jamf for your compliance needs, eliminating control owners' dependency and saving organizational time and resources. The integration process itself is seamless and should take no more than a few minutes to set up.

## Who uses anecdotes Compliance OS?

A growing number of tech leaders take advantage of anecdotes to navigate their security compliance journeys, such as:
